CARTRIDGES: THE B•RIGHT CHOICE

Tamperproof, non refillable dispensers.

The Cartridge dispenser range includes a wide selection of models, all aesthetically and functionally designed with particular attention to detail and with a “green” soul. All made from recycled plastic, they can be recycled again and again to reduce the waste, following the circular economy principles.

Attention to the product design means also taking great care of all **safety features and economical aspects**, to offer our guests a product that can be at the same time safe and extremely convenient for the hospitality world.

≤100%

Post consumer plastic

100%

Recyclable plastic

60% LESS PLASTIC

The ratio of plastic used per millilitre is much lower than the plastic used in a single use bottle. In comparison to a 30 ml bottle, the amount of plastic used is 60% less.

LOW CARBON FOOTPRINT

we save 87%* of CO₂ emissions for the complete plastic resin production used in our recycled bottles.

* This data is available due to a LCA calculation on our post consumer PET resin compared to a virgin resin.

OCEAN PLASTIC AVAILABLE

Turning ocean waste into bottles

POST CONSUMER PLASTIC IN THE CIRCULAR ECONOMY

AFTER USE, THE RECYCLABLE PLASTIC IS SORTED AND SENT TO SPECIALIZED FACILITIES WHERE IT IS BROKEN DOWN INTO REUSABLE PLASTIC FLAKES.

THESE FLAKES, KNOWN AS POST-CONSUMER PLASTIC, CAN BE REFORMED AND REUSED INDEFINITELY WITH CAREFUL MANUFACTURING.

THIS PROCESS IS ENDLESS: NEW PLASTIC CAN BE OBTAINED FROM OLD PLASTIC IN A CIRCULAR ECONOMY MODEL THAT AIMS TO CREATE VALUE FROM WASTE.

Reduction of risk of theft, thanks to holder with key.

Time saving for cleaning team.

Packaging waste is typically reduced by 60%.

Easier management of amenities stock, less space needed.

Up to 85% reduction of labour cost, no need for refilling sealed dispensers!

Labels wrap the bottles to leave only the band necessary to check the level of the product.

PRODUCTS INTEGRITY MAXIMUM HYGIENE

Tamper-proof closures (caps and pumps) guaranteed the integrity of products for the final user and the maximum hygiene (not contaminated by handling operations).

BATCH NUMBER

With the BATCH number it will be possible to provide all the bulk's documentation in case of any problems (intolerances, allergies, irritations, etc.).

Guests can check the bulk revision, written on the label.

Avoid refilling error.

Guests are not limited to a 30ml based on 2 guests per room.
